

Hard Scale Softener & Remover

Tough Scales - Now Easy To Remove

Sugar Industry experiences heavy scaling problem in evaporators. This causes severe decline in heat transfer coefficients (HTC) which results in poor production rates and factory shut-down. **SWEETOL™ EV37** softens and removes the scales in the shortest time saving money.

Scaling varies from mill to mill and season to season. Scales also vary from the first to the last evaporator body. **SWEETOL™ EV37** has been formulated to work on the toughest scales such as -

- **Amorphous Silica Scale**
- **Calcium Oxalate (mono & di-hydrates) Scale**
- **Calcium Phosphate (tri-calcium phosphate & Hydroxyapatite) Scale**
- **Organic Scale (proteins, polysaccharides, etc.)**
- **Calcium Carbonate Scale**
- **Calcium Sulfate Scale**
- **Iron Oxide Scale**

SWEETOL™ EV37 is used in combination with Caustic Soda. Proper use of product is important to achieve good results. Dosage depends on a variety of parameters which includes (but not limited to) heating surface area of evaporator body, water holding capacity of evaporator, evaporator body number, temperature and pressure conditions. Information on the type and thickness of scale (if available) is helpful in determining the dosage. Please consult your sales representative or call +1-850-575-0921 before using the additive. Use of personal protective equipment is required when handling this product. Refer to MSDS for safety information.

- ✓ Easily removes hard scales.
- ✓ Removes scales up to 10 mm thick.
- ✓ Eliminates manual labor.
- ✓ Eliminates hazardous acid cleaning.
- ✓ Reduces cleaning time.
- ✓ Reduces cost of cleaning chemicals.

Specifications*	
Appearance	Light Green
% Solids	37% (± 0.5)
Specific Gravity at 25°C	1.1 (± 0.1)
pH	10 (± 0.5)

* Subject to change for custom products.
